Title and abstract of the doctoral thesis

Title and abstract of the doctoral thesis (within 150 words)

This study was aimed at exploring the impact of a teaching/learning program, which was based on Goleman's Emotional Intelligence (EI) theory, focused on enhancing EI and minimizing the violent behavior of aggressive students. A sample of 78 students was taken from grades 5 and 6.

The program had a positive and significant effect on improving the EI levels in favor of the experimental group. However, it did not have any considerable effect on raising the EI levels in terms of gender. Similarly, it did not have any considerable effect on raising the EI levels in terms of the variable of interrelation between group and gender.
