**Efficacy Of A Jordanian Version Of The Adaptive Behavior Assessment System (Abas–Ii) In Identifying Adaptive Behavior Deficit Among Different Disability Groups.**

The purpose of this study was to investigate the effectiveness of the Jordanian version of the Adaptive Behavior Assessment System (ABAS-11, 2003) , second

edition, in Detecting the manifestations of the deficit in adaptive behavior skills, and detecting the possible areas of performance among normal individuals and individuals with Intellectual disability, individuals with autism disorder ,visual impairment and hearing impairment on the adaptive skills Profiles, for disability groups, of performance on the rating of parents and teachers in the scale. This will be achieved through calculating validity and reliability as well as performance levels on the Jordanian version of the scale for the sample which the age range was (6-15) and consisted of (1009) participants.
