The Impact of Camp New Amigo on Social Skill for Children with Autism

Spectrum Disorder

The study examined specific social skills that children with ASD need to improve in their life. This quantitative study obtained data from 40 parents who have children or youth with ASD who participated in a one week day camp. A modified version of the Autism Social Skills Profile (ASSP) was given three times to determine if children and youth with ASD made improvements in social skills after participating in the one week day camp. Survey 1 was distributed before the beginning of camp, survey 2 was given at the end of camp, and survey 3 was given eight weeks post camp. These results suggest that participants who attended Camp New Amigos showed a positive impact on social skills for children and youth with ASD, as rated by their parents.

Career Experience

Job Title	Place of work	Date
Teacher	Ministry of Education -Jordan	1996-2006
Principal	Ministry of Education -Jordan	2006-2007

Graduate Assistant	New Mexico State University	2009-2015
