Title and abstract of the doctoral thesis (within 150 words)

An Algorithm for Computer Simulation of Elasticity of Demand for Higher Education.

This research study was carried out in seven major steps to develop a planning simulation model in the area of elasticity of demand for higher education. The results of this study are intended to serve as a quantitative tool to aid planners and decision makers in reaching conclusions concerning the elasticity of demand for higher education and to help them to predict and optimize-actions which are very important in reaching better decisions. Under the assumption that university are open to all students who can afford the expense and have the capacity for maximum enrollment the simulation model developed was divided into three phases; the first phase illustrated use of two techniques to compute elasticity. The second phase involved use of forecasting techniques. Phase three was the plotting process and the construction of the optimization tables showing (a) the real values for the cost and enrollment for what is, (b) the forecast values of what should be.

The principal conclusion of the study is that by utilizing the concepts presented, the demand problem will be identified; the user will be able to forecast enrollment, cost, and elasticity to predict what the situation will be in his/her institution in the future. Then he or she will be able to make optimal decisions.

Career Experience

Job Title	Place of work	Date
Full time lecturer	University of Jordan	1983
Assistant professor	University of Jordan	1984
Associate professor	University of Jordan	1989
Professor	University of Jordan	2000

Administrative works and committees

Administrative work and committee	Date
Department Chair Of the educational administration department – University of Jordan.	1992-1994

Director of the Educational Research program - University of Jordan.	1995-1996
Dean of. Educational Sciences College - Hashemite University.	1999-2001
Dean of. Educational Sciences College – University of Jordan.	2006-2007
